React + React Native Coursework

San Diego State University

B.A.S. — Technical Theatre /
Theatre Design & Technology

Profile

Front End & WordPress Developer building dynamic, visually-driven websites and apps that translate design systems into responsive, brand-consistent experiences. My background in film and TV art departments trained me to read a brief, execute under pressure, and sweat the details that matter on screen — instincts I carry directly into every build. Currently integrating AI into production workflows, including building apps with the Claude API.

Employment History

Front End Developer — Independent, New York City

2021 – Present

- Built and deployed Chromaterra (React 19, Vite, Firebase, Claude API— an AI-powered color palette app achieving 90 Performance, 96 Accessibility, 100 Best Practices, and 92 SEO on Lighthouse; resolved 7 WCAG 2AA violations via Pa11y audit to achieve full compliance.
- Developed Universo da Doçura, a custom WordPress theme with ACF, custom post types, and PHP templates deployed to live hosting; achieved 100/100 Lighthouse Best Practices score and resolved 23 WCAG 2AA violations via Pa11y audit to achieve full compliance.
- Translated a **Figma** design to a **live WordPress site** for a client, handling **theme customization, responsive layout, and brand implementation.**

Additional Experience

AI Output Evaluator — Outlier, New York City

2024 – Present

- Assessed AI-generated responses for accuracy, clarity, and alignment with user intent to improve LLM output quality.

Workshop Instructor (Contract) — Girl Develop It, New York City

2022 – 2023

- Designed and taught two-day Intro to CSS Animations workshops on Zoom, building interactive CodePen exercises for learners at multiple skill levels.

Art Department Coordinator — IATSE Local 829, Greater NY Area

2018 – 2020

- Coordinated operations across 7 scripted TV and film productions — managing vendor relationships, budgets, and logistics under tight production deadlines.
